

QHook® Tile Mounts

Quick Hook®, featuring QHook technology, provides a fast and simple way to install solar on tile roofs. Quick Hook is designed for use with side-mounted or bottom-mounted rails, with multiple height options for use with a variety of tiles. Optional Tile Replacement Flashings work with Flat, S and W-shaped tile profiles to speed installation. The flashing replaces a tile, so there’s no messy, time-consuming tile grinding or cutting required. Works with all standard curved and flat tile roofs, and all standard rail-based racking systems. The Quick Hook and Tile Replacement Flashing are fully engineering to meet code requirements and industry best practices.

TECHNOLOGY BENEFITS

- Multiple height options for use with a variety of tiles
- Designed for use with side-mounted or bottom-mounted rails
- Sliding hook makes it easy to hit rafter and match hook to valley of tile
- Quick Hook includes preformed sub flashing for code compliance
- Optional Tile Replacement Flashing for Flat, S-shaped or W-shaped tile
- Meets or exceeds all roofing industry best practices; 100% IBC compliant
- 25-year warranty
