

Innovation for a Better Life

LG's new module, LG NeON™ 2, adopts Cello technology. Cello technology replaces 3 busbars with 12 thin wires to enhance power output and reliability. LG NeON™ 2 demonstrates LG's efforts to increase customer's values beyond efficiency. It features enhanced warranty, durability, performance under real environment, and aesthetic design suitable for roofs.

LG NeON™ 2 has an enhanced performance warranty. The annual degradation has fallen from -0.7%/yr to -0.6%/yr. Even after 25 years, the cell quarantees 2.4%p more output than the previous LG NeON™ modules.

Aesthetic Roof

LG NeON™ 2 has been designed with aesthetics in mind; thinner wires that appear all black at a distance. The product may help increase the value of a property with its modern design.

Better Performance on a Sunny Day

LG NeON™ 2 now performs better on sunny days thanks to its improved temperature coefficiency.

High Power Output

Compared with previous models, the LG NeON™ 2 has been designed to significantly enhance its output efficiency, thereby making it efficient even in limited space.

Outstanding Durability

With its newly reinforced frame design, LG has extended the warranty of the LG NeON™ 2 for an additional 2 years. Additionally, LG NeON™ 2 can endure a front load up to 6000 Pa, and a rear load up to 5400 Pa.

Double-Sided Cell Structure

The rear of the cell used in LG NeON™ 2 will contribute to generation, just like the front; the light beam reflected from the rear of the module is reabsorbed to generate a great amount of additional power.

About LG Electronics

LG Electronics is a global player who has been committed to expanding its capacity, based on solar energy business as its future growth engine. We embarked on a solar energy source research program in 1985, supported by LG Group's rich experience in semi-conductor, LCD, chemistry, and materials industry. We successfully released first Mono X® series to the market in 2010, which were exported to 32 countries in the following 2 years, thereafter. In 2013, NeON™ (previously known as Mono X® NeON) & 2015 NeON2 with CELLO technology won "Intersolar Award", which proved LG is the leader of innovation in the

Mechanical Properties

| Cells | 6 x 10 |
|------------------------|----------------------------------|
| Cell Vendor | LG |
| Cell Type | Monocrystalline / N-type |
| Cell Dimensions | 156.75 x 156.75 mm / 6 inches |
| # of Busbar | 12 (Multi Wire Busbar) 🜞 |
| Dimensions (L x W x H) | 1640 x 1000 x 40 mm |
| | 64.57 x 39.37 x 1.57 inch |
| Front Load | 6000 Pa / 125 psf 🐡 |
| Rear Load | 5400 Pa / 113 psf 🌞 |
| Weight | 17.0 ± 0.5 kg / 37.48 ± 1.1 lbs |
| Connector Type | MC4, MC4 Compatible, IP67 |
| Junction Box | IP67 with 3 Bypass Diodes |
| Length of Cables | 2 x 1000 mm / 2 x 39.37 inch |
| Glass | High Transmission Tempered Glass |
| Frame | Anodized Aluminum |
